1. The following is an examiner's statement of reasons for allowance: the claims are allowable because the prior art of record fails to disclose or teach the recited case having a partition wall and a first case and a second case. Each case has an end surface which are joined together to each other. Each case further has a plurality of pin contact portions which are raised surfaces integrally molded into the cases by injection molding. The pin contact portions reduce defects such as deformation and scratches on the molded cases caused by the ejector pin contacting the molded cases upon removing the molded cases from the molding die.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
